## **Natural Oncology Support & Breast Surgeons - for you or loved ones**

To support a journey to recovery here are some resources for your consideration. They are not much, as our services are more focused on prevention, but clients have offered and prompted sharing.

**First, a professional note:** as you progress through treatment, please also consider identifying and remediating the source to support a cure. [Consider this article](#) which explains the importance of knowing the kind, grade and stage involved in any cancer diagnosis so as to make more informed decisions about treatment. Also, rather than focusing only on treating the symptom/tumor(s), please address the underlying cause(s) of the process that created the tumor to obtain a real cure and avoid future reoccurrences/problems in the body.

**Regarding cancer and treatment,** check out: [thetruthaboutcancer.com](http://thetruthaboutcancer.com), [hope4cancer.com](http://hope4cancer.com), [chrisbeatcancer.com](http://chrisbeatcancer.com), [chriskresser.com](http://chriskresser.com), [healingstrong.org](http://healingstrong.org), [beatcancer.org](http://beatcancer.org), [cancercanbekilled.com](http://cancercanbekilled.com), [cancertutor.com](http://cancertutor.com) and [breastcancerconqueror.com](http://breastcancerconqueror.com).

**For interviews, treatment resources and books recommended** by breast cancer survivor clients, consider [Cancer Related videos](#). Samantha Bales, one of the breast cancer survivors featured, welcomes your contact at [sbales@mac.com](mailto:sbales@mac.com).

**While there are many reconstruction options these days,** consider learning about [Breast Implant Illness](#).

**Since many clients' heart attacks, cancers and illnesses are being blamed on dental care** (especially wisdom teeth extractions), please read chapter 6 in the book [Take Back Control of Your Health](#).
